

Fast, safe and reliable! KÖSTER KSK Membranes

KÖSTER KSK membranes are one of the fastest ways to install area waterproofing on concrete slabs, basement walls, and under screeds. KÖSTER KSK membranes are self-adhesive and do not require hot air or open flame to install. They have the advantage of a fast & clean installation without the need for welding, providing an immediate waterproofing effect against rain or even pressurized water. KÖSTER KSK membranes are also suitable as a vapor and Radon barrier systems under floors. KÖSTER KSK membranes are used as a waterproofing system according to the DIN 18 533.

KÖSTER

Waterproofing Systems

Waterproofing with KÖSTER KSK Membranes

Issued: 5/2021

Immediately waterproof!

Substrate preparation

Priming the substrate

Applying the membrane

Ready!

KÖSTER KSK SY 15

KÖSTER KSK ALU Strong

KÖSTER KSK ALU 15

Advantages of KÖSTER KSK Membranes

- Cold applied
- Self-adhesive
- Ideal for working around details
- No hot air or propane gas welding is required
- Immediate waterproofing effect
- No waiting time before backfilling or adhesion of insulation boards or SD membranes
- High bonding strength
- Uniform waterproofing layer
- Solvent-free
- Crack-bridging
- Fast application
- Highly aging resistant
- Laminated on the top side with a highly tear resistant foil
- KÖSTER KSK SY 15 is radon-proof tested
- Can be applied to all mineral substrates as well as to plastic and metal
- Highly flexible
